DETAILED ACTION

The following is a response to the amendment received on April 5, 2007 which has been entered.

Response to Amendment

Claims 1-9 and 23 are pending in the application. Claims 10-22 and 24 are withdrawn and claim 25 is cancelled.

-The 102(b) rejection of claim 25 has been withdrawn due to applicant canceling this claim.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Harrington on April 13, 2007.

The application has been amended as follows:

-Claims 10-21, 22 and 24 have been cancelled.

-In claim 23, "the control system including means for increasing motor torque during a torque phase and reducing motor torque during an inertia phase of a power-on upshift of the transmission" has been inserted due to the amendment filed April 5, 2007 leaving this claim incomplete.

Allowable Subject Matter

Claims 1-9 and 23 are allowed. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-a method and control system for controlling ratio changes during a power-on upshift in a hybrid electric vehicle wherein an electric motor torque is increased during a torque phase and reduced during an inertia phase of upshifting in which torque variations in the transmission power output member are modulated and in combination with each and every limitation disclosed in claims 1 and 23.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
